DETAILED ACTION

1. The amendment filed 08/16/2001 (Paper No. 7) has been entered. Claims 46-55 are pending.

Election/Restriction

- 5 2. Restriction to one of the following inventions is required under 35 U.S.C. 121:
- I. Claim 46, drawn to a diagnostic method utilizing an antibody bound to a solid support, classified in class 435, subclass 7.92.
 - II. Claim 47, drawn to a diagnostic assay involving determining the amount of a nucleic acid having the nucleotide sequence of SEQ ID NO: 1, classified in class
10 435, subclass 6.
 - III. Claims 48-53, drawn to a diagnostic assay involving hybridizing DNA fragments with a 15-mer oligonucleotide that hybridizes with the nucleic acid sequence of the bcl-6 locus, classified in class 435, subclass 6.
 - IV. Claim 54, drawn to a gene therapy utilizing antisense, classified in class 514,
15 subclass 44.
 - V. Claim 55, drawn to a therapeutic method utilizing an indeterminate antagonists, indeterminate class and subclass.
3. The inventions are distinct, each from the other because of the following reasons:

Art Unit: 1647

a. The following pairwise combinations of methods are independent and distinct, wherein each member of a pair performs different functions, using different starting materials and/or process steps and/or with different outcomes: I and each of II-V; II and each of III-V; III and each of IV-V; IV and V.

5 4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

5. Because these inventions are distinct for the reasons given above and the searches required are not coextensive, restriction for examination purposes as indicated is proper.

10 6. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

7. This application contains claims directed to the following patentably distinct species of the claimed invention: each of the species in claim 52.

15 Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 48, 51, 52 are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon,

Art Unit: 1647

including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

8. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

9. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
